

20-Tube High-Pressure Solar Heat Pipe Collector

SSHM20

Higher-Capacity Collector for Split Pressurised Solar Water-Heating Systems

The SSHM20 is a high-pressure solar collector equipped with 20 evacuated tubes measuring 58 mm × 1,800 mm. Its sealed heat pipes transfer collected solar heat to the manifold for connection to a separate pressurised storage tank or solar thermal system.

Applications

Suitable for larger split solar water-heating systems serving homes, villas, hotels, apartment buildings and commercial hot-water applications.
